Supplier information

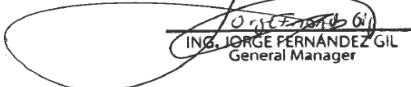

On July 1, 2016 a new legislation took place and is applicable to food labeling rules and guidelines with regard to the declaration of allergens. On top of this, concerned about the safety of food offered to the customers, we remind the important of compliance with this regulatory demand. All food sold in Brasil must have labels compliant with this regulation. Products manufactured by the end of adjustment period (30/06/16) may be commercialized until the end of its shelf life, without any problem. To check if it's necessary adjustments in the labeling of products please, answer the questions below:
